## Crossings Kill 565

"A lack of respect for railroad grade crossings is costing for too many lives annually in our State," California Highway Patrol Commissioner Bradford M. Crittenden has pointed out. "During the last five years 565 persons have lost their lives needlessly at grade crossing, and the 22 rail crossing deaths recorded for January of this year indicate the wasteful slaughter is continuing."

"THE LAW is very clear—it calls for a full stop whenever you approach a railway crossing warning device which is in operation," the commissioner added. After making the full stop the driver may proceed if the crossing can be made safely.

"The old adage that familiarity breeds contempt is borne out by the number of these grade crossing accidents which occur near the victim's place of residence," he said.

APOLLO UNVEILED . . . General configuration of the Apollo spacecraft was released for the first time yesterday by North American Aviation, Downey. Apollo spacecraft is designed to carry three men on a two-week trip to the moon. Viewing the mockup are Douglas Chidley, North American, left; and Paul C. Scofield, Garrett-AirResearch, who is responsible for

developing the vital environmental control system which will keep the astronauts alive. Seen protruding from the mockup is a periscope at left, two windows with mirrors and a hatch. Garrett-AirResearch is building a new space lab in Torrance, which will simulate a trip to the moon, and will be used to test the Apollo environmental control system.

## Day in the Navy Planned For High School Writers

More than 100 civic, business, and educational leaders will join 300 high school reporters for "A Day in the

Navy" on April 19.

Many school principals and journalistic instructors will participate in a day-long cruise aboard the Yorktown, a slant deck attack carrier, which will sail at 7 a.m. from Long Beach Naval Base.

Student journalists will sleep aboard the Yorktown before the day's cruise following a tour of the Long Beach Naval Base on April 18. Jet planes will fly over the ship during the cruise and a submarine will make a simulated

attack. Attack-bombers will demonstrate "over the shoulder" bombardment.

Helicopters and anti-submarine planes will show their roles in modern sea warfare. An accompanying destroyer will be refueled under way. Personnel will be transferred to it by a high line.

The high school journalists will compete for prizes offered for the best stories to appear in their newspapers. The school scoring the highest will be awarded a sword trophy by

Rear Adm. M. E. Arnold, commandant of the 11th Naval District.

## College Play Scheduled

"The Waltz of the Toreadors" by Jean Anouilh has been chosen for Harbor College's first full length play of the year.

Casting has been completed and actors are in the midst of rehearsals for the play which will be presented in the Starboard Theater on the Wilmington campus April 27-29 and May 1-5.

Eugene Dynarski, veteran of many Harbor productions, will head the cast as General Saint Pe with Jacqueline Smalley taking the part of his wife. Other characters will be portrayed by James Schuler, Dianne Farnum, Kathe Hooker, Heather McKeag, Joe Rojas, Delray Gallwas, Charles Bean and Cherry Young.

REUBEN PLASKOFF, drama instructor will direct the play with the assistance of Lizz Glogovcan and Brian Hagen.

The play is set in France at the turn of the century. It is a high satirical drama about an aging general who sees himself as a great lover that he used to be.

"This high-style comedy lends itself well to the arena staging of the Starboard Theatre," said Plaskoff. "It also continues a Harbor tradition of presenting challenging dramas."

General admission will be \$1, while high school students and ASO card-holders will be admitted for 25 cents.

Every 12 minutes in the last

year a Balanced Power Home

was sold in Southern California

During the 12-month period ending February 28, 1962, Southern Californians invested nearly \$1 billion in Balanced Power homes. Here's why Balanced Power was the overwhelming choice: Balanced Power gives you the best of both gas and electricity. Each household job is done by the power that does it faster, better, at lower cost. This means that modern gas handles the cooking, heating and air conditioning, water heating and clothes drying. Electricity provides for well-planned lighting, TV, disposers, vacuum cleaners and other handy appliances. Balanced Power is the logical, common-sense approach to modern home design that lets you live better and spend less. Keep this in mind when you shop for a new home. Look for the sign of Balanced Power now being displayed by leading builders throughout the Southland.
